

Economy

Congresswoman Doris Matsui is a strong advocate for taking action now to stabilize our economy and ensure a prosperous future for Sacramento and America. She believes that investing in our Nation's infrastructure is a key component of this stability. Historically, infrastructure projects are one of the fastest and most reliable routes to stimulating the economy. Congresswoman Matsui also favors short-term solutions to address economic issues, including supporting our country's unemployment benefits programs and health care assistance programs. She is a vocal proponent for federal and state partnership to help ease the financial burden the States feel as a result of balancing their budgets every year.
